

Term 4 Curriculum Overview

Year 6 2026

Pride
Respect
Learning

English

Narrative Texts

Reading and Viewing

- read, view and comprehend texts, analysing how characters, settings, events and ideas are developed and how these influence meaning
- identify and explain text structures and language features of narrative and informative texts, and how visual features contribute to meaning

Writing and Creating

- create written and/or multimodal texts including narratives, recounts and persuasive texts for different purposes and audiences
- organise, develop and link ideas using cohesive devices and a range of sentence structures
- use accurate spelling, punctuation and varied vocabulary, including topic-specific and descriptive language

Mathematics

Number and Algebra

- order and represent numbers to at least one million and apply place value to partition, rename and compare numbers
- recall and apply efficient strategies for addition, subtraction, multiplication and division with large numbers
- recall and demonstrate the use of factors, multiples, prime, composite and square numbers
- solve problems using the four operations with whole numbers, decimals and fractions
- investigate and describe number patterns and algebraic expressions, including the use of variables and simple equations

HASS

Geography

- examine the interconnections between people, places and environments, and how these change over time
- investigate the characteristics of places at different scales and the factors that influence these characteristics
- collect, sort, analyse and interpret information and data from primary and secondary sources
- draw conclusions and make informed proposals about sustainable practices
- present narratives and explanations using sources and subject-specific terms

Science

Physical Sciences

- describe how light energy behaves, including reflection, refraction and the formation of shadows
- explain that light travels in straight lines and how this can be used to solve problems with vision
- investigate how light has been used to develop technologies that assist with vision
- plan and conduct investigations, identify variables and analyse results
- communicate findings using scientific language and representations
