

Term 4 Curriculum Overview

Year 5 2026

Pride
Respect
Learning

English

Narrative Texts

Reading and Viewing

- read, view and comprehend texts, analysing how characters, settings, events and ideas are developed and how they influence meaning
- identify and explain text structures and language features of narrative and informative texts, and how visual features contribute to meaning

Writing and Creating

- create written and/or multimodal texts including narratives, recounts and informative texts for different purposes and audiences
- organise, develop and link ideas using paragraphing and a range of cohesive devices
- use accurate and varied sentence structures, punctuation and spelling
- use topic-specific and descriptive vocabulary to enhance meaning

Mathematics

Number and Algebra

1 2 3

- order and represent numbers to at least 100 000 and apply place value to partition, rename and compare numbers
- recall and demonstrate strategies for addition and subtraction with larger numbers
- recall and demonstrate multiplication facts for factors up to 12 and related division facts
- use efficient strategies to solve problems involving the four operations with whole numbers
- investigate and describe number patterns involving multiples, factors and prime, composite and square numbers

HASS

Geography

- examine and explain the characteristics of places and the connections between people, places, economies and environments
- investigate why and how places change over time and the factors that influence these changes
- collect, sort, and analyse information and data from observations and a range of sources
- draw conclusions and make informed proposals about sustainable practices
- present narratives and explanations using sources and subject-specific terms

Science

Physical Sciences

- examine how light and sound are produced and describe the characteristics of light and sound energy
- investigate how light and sound travel and how they can be reflected, refracted or absorbed
- plan and conduct fair tests to explore questions and identify variables
- record and analyse data, and consider the reliability of results
- suggest explanations for findings and consider the implications for people and the environment
